DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsui et al (US2005/0000827).

Matsui et al discloses a heat generating warming article comprising a heat generating element making use of chemical energy adapted to supply heat to a surface wherein the surface temperature at 38-49 degrees Celsius for 3-15 hours, including an oxidizable metal between 60-90% by weight, a reaction accelerator 5-25% by weight, a fibrous material 5-35% by weight, an electrolyte solution (abstract, paragraph 0012-0019; 0033-0035; 0055). Matsui et al does not disclose steam. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have included generating steam as an alternative form of heat release.
